# READING RECORD

## Skills

Students will:

- ✦ identify literary genres
- ✦ evaluate written material
- ✦ draw conclusions based on their record keeping

## Purpose

The Reading Record form not only gives children a place to record reading selections, it also asks them to identify the genres they choose and to chart their own reading patterns. Teachers may establish criteria for using the form such as “comment on character change in the story,” or “choose from at least three different genres.”

## How to Use the Organizer

Introduce this record-keeping form after children have had experience in identifying different literary genres. Ask children to record the date, title, and author, and the number for the type of book on the form. Some children may have difficulty recording genre, since a book can be both fantasy and humorous. To help children choose a number, suggest that they think of the author’s purpose for writing the book. If the genre is still not clear, you may want to have children look up the Library of Congress classification or simply have them record more than one number in the box provided. Students can write general impressions in the comment section, or you might suggest that they answer a particular question when responding.

## Examples

### Primary Grades

A third-grade teacher identified a student’s reading and response patterns, and guided her toward longer works by helping her find chapter books that had brave female protagonists and/or compassion for animals.

### Intermediate Grades

Fifth graders were asked to record and evaluate their at-home reading. They were required to read a variety of books—at least four different genres for each reading form.
